## **GreenNet: The scientific & midterm conference**

Category: Central Events

19-20 February 2013 Vienna, Austria

### **"How to push the implementation of the European Green Belt by landscape policy instruments?"**

The European Green Belt as an ecological network has an unique natural and cultural heritage with an emotional human and political history, meaning and power. It is a corridor with many biodiversity hotspots and connects 24 European countries and valuable landscapes. Due to the remaining gaps of about 50% within the European Green Belt there are a lot of challenges left. How to handle them is the principal theme of the conference of the Central Europe-project GreenNet – Promoting the ecological network in the European Green Belt.

More information about the programme through the GreenNet web page <http://greennet-project.eu/content/2nd-scientific-midterm-greennet-conference>

### **FINAL REGISTRATION: 25 January 2013**

The number of participants is limited. There is no conference fee.
